DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Lien (5,396,492).

Regarding claims 1, 2 and 3, Lien discloses an adaptive clock recovery apparatus showing a device for receiving data transmitted using ATM technology, a data-independent clock signal being added to the device (33, 23), and a FIFO memory device (15) for storing the received data for the required period of time in order to compensate for transmission delay.

Regarding claim 4, see col. 3, lines 44-48.

Regarding claim 5, note counter 23.

Regarding claim 6, the VXCO is not synchronized with the transmission end. Lien further shows a means for adjusting (25, 30, 33, 23).

Regarding claim 7, see col. 11, lines 2-5.

Regarding claim 8, see col. 4, lines 17-22.

Regarding claims 9 and 18, Lien inherently includes a data parser (see col. 1, lines 18-19).

Response to Arguments

3. Applicant's arguments filed 2/28/08 have been fully considered but they are not persuasive.

In considering applicant's argument that Lien does not teach the clock signal as claimed, the examiner disagrees. The clock signal in Lien is data-independent because it does not rely on any of the incoming data signals. The clock signal is generated by monitoring the volume of the FIFO memory. It is totally independent of the content of the incoming data. Although it might be generated by an open loop, the loop is independent of the incoming data because there is no parsing or demultiplexing circuit means for separating synchronizing data from the incoming data. Since Lien still meets all the limitations as claimed, the rejection stands.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
